SUMMARY

Passionate Frontend Developer with experience in JavaScript, TypeScript, React.js, Context API, Redux, JSX, and Tailwind CSS. Currently working with Next.js (App Router) and Implementing Full-stack features including Payment Gateway integration (Razorpay), Authentication systems (NextAuth.js), and MongoDB database management. Demonstrated ability to build responsive, user-centric applications with modern UI/UX practices and custom styling solutions. Committed to solving Real-world problems through web development and API integration. Actively upskilling through a Full Stack Web Development course by CodeWithHarry on YouTube and a Communication Skills course by TJ Walker on Udemy. Open to Collaborative environments and eager to contribute within team settings. Always ready to Research and learn new technologies to stay ahead in the field.

SKILLS

Intermediate: JavaScript, TypeScript, React.js, Next.js, Tailwind CSS, HTML, CSS, Context API, Redux, REST API Integration, Git & GitHub and Communication

Beginner/Learning: Payment Gateway Integration (Razorpay), Authentication Systems (NextAuth.js), Node.js, Express.js, MongoDB, Database Management, EJS, Vite

PROJECTS

Get Me a Coffee [GetMeACoffee](#) Oct 2025

Technologies: Next.js 13, React, MongoDB, NextAuth.js, Razorpay, TailwindCSS, Server Actions

- Implemented secure payment processing using Razorpay gateway, handling real-time transactions
- Built authentication system with NextAuth.js, integrating GitHub OAuth for secure user access
- Designed responsive UI with TailwindCSS, achieving optimal performance across all devices
- Developed RESTful APIs using Next.js Server Actions for efficient client-server communication

iTask WebSite Using React [iTasks](#) May 2025 - Jun 2025

Technologies: JavaScript, React, Context API, and Tailwind CSS

- Built a task-tracking web application using React.js with core functionality to add, edit, mark as completed, and delete tasks.
- Implemented React Router for seamless page navigation.

Password Vault [Vault Repo](#) Sept 2025

Technologies: MongoDB, Express.js, React.js, Node.js, Tailwind CSS for styling and React Router

- Developed a Password Vault web application with secure credential storage, enabling users to add, edit, delete, and copy login details with a responsive UI.
- Implemented backend API integration for secure storage in MongoDB, with fallback to local storage for offline functionality.

WORK EXPERIENCE

True Path Foundation Jun 2025 - Sept 2025

Frontend Intern

- Collaborated with a Grassroots non-profit to design and propose a complete UI/UX overhaul for their upcoming initiative website, based on WordPress.
- Independently developed a functional Demo website to present layout, theme, and design direction, helping the Team visualize the platform's potential.
- Took initiative to guide the organization through Technical decision-making despite their limited technical background.
- Proposed and led a one week research sprint with a colleague to assess tools, features, and strategies needed to build a manageable, scalable, and user-friendly web solution.
- Demonstrated strong Communication skills by presenting work during team meetings, gathering feedback, and aligning design vision with Organizational goals.

EDUCATION

Bachelor of Computer Applications (BCA) (Final year) Final year

G H Raisoni College of Engineering and Management, Amravati, 8 CGPA
